# BirdMark

Perforated disc, containing all the reflective properties for birds in flight by day and night.

The disc absorbs and emits ultraviolet light that is only visible to birds. Birdmark bird diverter continues to emit 10 to 12 hours after sunset.

Birdmark is perfect for extreme wind conditions in the mountains: 90% of the wind passes through the perforations in the disc.

Movement: the product sways in the wind to attract attention to approaching birds.

**BIRDMARK - WHITE**

Available on [shop.idm-france.com](http://shop.idm-france.com)

High performance clamp with simple installation system

- Ultraviolet light visible only by birds

- Withstands extreme wind and mountain conditions

**BIRDMARK - ORANGE**

Available on [shop.idm-france.com](http://shop.idm-france.com)

IDM reference	Designation	Dimensions	Clamp	Easy mounting
00016	Bird Diverter BirdMark Orange	145x140x265mm	Fixed - 10-70mm	✓
00906	Bird Diverter BirdMark Orange	145x140x265mm	Fixed - 04-16mm	✓
00225	Bird Diverter BirdMark White	145x140x265mm	Fixed - 10-70mm	✓
00762	Bird Diverter BirdMark White	145x140x265mm	Fixed - 04-16mm	✓
06824	Orange Plastic Disc	Diam. 140mm	Only the disc - Without clamp	
06825	White Plastic Disc	Diam. 140mm	Only the disc - Without clamp	

**IDM TIPS** | Alternate colours are strongly recommended | Position every 3-5 m

With DB Schenker Eco Neutral, IDM delivers your products with low CO2 emissions

# FireFly

The FireFly bird diverter uses both light reflection and UV absorption to reflect ultraviolet light that is only visible to birds.

The translucent effect of the plastic body allows light to pass through it in poor conditions (low light and fog).

The 360° rotating system improves visibility in windy conditions

High performance clamp with simple installation system

Available with 360° rotating or fixed system

Effective in low light or extreme conditions

**FIREFLY - WHITE**

[Available on shop.idm-france.com](http://shop.idm-france.com)

**FIXED FIREFLY - WHITE**

[Available on shop.idm-france.com](http://shop.idm-france.com)

IDM reference	Designation	Dimensions	Clamp	Easy mounting
06999	Bird Diverter Firefly White SF10	110x110x340mm	Rotation - 10-70mm	✓
00607	Bird Diverter Firefly White SF4	110x110x340mm	Rotation - 04-16mm	✓
07242	Bird Diverter Firefly White - Fixed FF/HW	110x110x340mm	Fixed - 10-70mm	✓
07212	Bird Diverter Firefly White - Fixed FF/HW	110x110x340mm	Fixed - 04-16mm	✓

## IDM TIPS

| In extreme wind conditions, use the fixed Firefly

| Position every 10 m

With DB Schenker Eco Neutral, IDM delivers your products with low CO2 emissions

# Skilift Bird Diverter

A float-shaped diverter (egg-shaped) totally designed for installations with a small diameter rope line, between 4 and 6 mm.

Cost-effective and very efficient solution to mark out your various devices and thus protect the collision with birds.

This bird diverter is designed for extreme conditions: it is resistant to the effects of freezing and thawing, as well as to UV rays. It has an estimated life span of ten years.

Water and moisture from freeze/thaw phenomena are easily drained away without intervention thanks to the perforations.

**Must be installed at the end of the line.**

**AVIFAUNE CORDELINE  
FLAT/DOWNHILL PACK**

Available on [shop.idm-france.com](http://shop.idm-france.com)

The most economical and efficient solution

• Highly resistant to weathering, frost and moisture  
 • moisture

Ideal for ski lifts, rope line between 4 and 6 mm

**AVIFAUNE CORDELINE
