# TECHNICAL PARTNER FOR SNOW GROOMING SINCE 1993 !

Since 1993, IDM has been supporting ski resort operators in the maintenance, optimisation and reliability of their snow grooming machines. Over the years, we have built a close working relationship based on listening, understanding operational constraints, and developing sustainable technical solutions.

For IDM, being a technical partner means standing alongside operators for the long term, while taking into account the evolving practices and challenges of mountain environments. We support the transition towards more sustainable solutions with a pragmatic approach, without ever compromising equipment reliability. Innovation, yes — but always in service of efficiency, real-world operations, and the teams who keep the mountains running every day.

## IDM becomes a mission-driven company

After four years of continuous work and commitment, this initiative is now becoming a reality. This year, IDM becomes a mission-driven company and officially incorporates social and environmental objectives into its corporate statutes.

This approach reflects our determination to act alongside ski resort operators as a partner in transition, developing solutions that are practical, effective and aligned with the challenges facing mountain regions

[ecovertisbyidm.com](https://ecovertisbyidm.com)

## Corporate purpose

To promote an agile and sustainable trading model, rooted in proximity, to support the transition of local territories.

## More than 300 tonnes of CO<sub>2</sub>e saved with Ecovertis®
