

## Bike support Back Rack

Ref : 07222 / 07223

The BACK RACK was designed to increase capacity for chair lifts. It allows to board two to three Mountain bikes safely at once and is CE certified.

Because of the rear layout of mountain bikes, it does not imbalance the seat transversely. The bike is very easy to load and can be done by customers or by staff. Unloading is also very easy and at no time does it require you to lift the bike. Bike transportation during the lift ride is optimal and only the tires have contact with the device.

Load capacity: Bikes of up to 30 kg each  
 Quick assembly : by M10 screws  
 System weight approx. : 25 kg  
 Fits all types of fixed and detachable clamp seats.

### System benefits :

- Light aluminum construction
- No moving parts, maximum reliability and longevity
- No protruding edges
- Easy and fast assembly.
- Compatible with all types of chairlifts
- Suitable for all types and sizes of bikes

# Bike support Back Rack

## Loading and unloading principles

### PRINCIPLE 1 :

1. The customer loads the mountain bike

2. The customer takes a seat in front of the seat

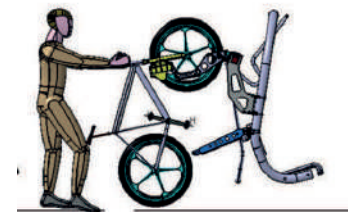

3. The customer goes behind the seat and unloads the mountain bike

### PRINCIPLE 2 :

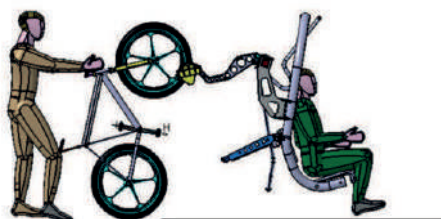

1. The customer loads the mountain bike

2. The customer takes a seat in front of the seat

3. The operator unloads the mountain bike

### PRINCIPLE 3 :

1.. The operator loads the mountain bike

2. The customer goes behind the seat and unloads the mountain bike
