KLÜBER Klübermatic NOVA CONTROL UNIT

Famille : Aerial lifts

SOUS-FAMILLE : AERIAL LIFTS PARTS

Temperature-independent electrochemical lubrication system

On the Klübermatic NOVA control unit, an electronic unit allows the supply period to be set between 1 and 12 months. It then calculates the quantity of gas required to ensure constant, reliable lubrication over this period, taking into account the ambient temperature. Klübermatic NOVA comprises a reusable control unit, a 125 cm³ lubricant cartridge (LC) filled with grease or oil with an integrated oil retention valve, and a protective cover.
