

Ref. IDM : 07920

**BIRD DIVERTER FIREFLY ULTRA SF6-14
ALPS (6-14mm)**

Famille : Aerial lifts

SOUS-FAMILLE : AERIAL LIFTS PARTS

Discover the new FIREFLY ULTRA bird beacon, an evolution of the highly successful traditional FIREFLY.

Effective and robust, the FIREFLY ULTRA bird beacon uses UV absorption to reflect ultraviolet rays that are only visible to birds.

The new features of the FIREFLY ULTRA :

- Increased invisible rays emitted, making it more visible to birds (in line with studies carried out by the Observatoire des Galliformes de Montagne (OGM)).
- Improved solidity thanks to a brand new reinforced connection between the clip and the plate.
